

LY-1400S2

FULLY AUTOMATIC SIDE SEALING BAG MAKING MACHINE FOR 2-LANE PRODUCTION (with 2 sets of photocell)

Features

- Two Servo-driven feeding system with two photocell for printed bag.
- Human-machine interface for easy setting.
- Machine can make the bags with different feeding length in the same time.
- Other options are available depends on sample bag.

Specification

Model	Max bag length	Max bag width			Max output
LY-1400S2	600mm, total 2 lanes	800mm / 1 lane, total 2 lanes			up to 200 bags / min / 1lane

Model	Thickness	Machine dimensions			Machine weight	Power required
		L	W	H		
LY-1400S2	0.01-0.1mm / 1 layer.	7000mm	4000mm	2000mm	3000kg	12kw

Notes : due to continual research and improvement, mechanical specifications are subject to further revision without prior notice.
